PROFILE

Software Engineer & Full Stack Developer with extensive experience in designing **web/mobile applications**, both for clients and for my own projects.

Specialized in **React/React Native**, **Typescript** and **NodeJS**.

I am passionate about my profession, continuously learning new things and applying the knowledge acquired to help others.

I am highly motivated to contribute with my capabilities to design solutions for challenging projects that allow me to broaden my views and enhance my skills.

TECHNICAL SKILLS

React - React Native - Typescript - Jest - Mocha - Cypress - Functional Programming - Object Oriented Programming - Git - MySQL - MongoDB - NodeJS - GraphQL

EXPERIENCE

Frontend Developer at clicOH

MAR 2022 - FEB 2023

- Developed new features and refactored/maintained code for various company's projects using technologies such as Typescript, React and Material UI (among others) working on a microservices flow.
- Created scalable code structure by the implementation of React Hooks, HOCS, Clean Architecture and following SOLID principles.
- Consumed resources from the company's REST API's.
- Implemented Unit testing to components and end-to-end testing to entire layouts.
- Documented components using Storybook and traced production errors using Sentry.
- Gived support to other company's areas and to my teammates, did pair programming.
- Delegated tasks to other developers and supervised their developments from start to finish.
- Provided talks/training sessions on various technologies related to web development.

Frontend Developer at Known Online

SEP 2021 - FEB 2022

- Designed and maintained multiple eCommerce websites for various company's clients using VTEX IO (JavaScript framework).
